JESSICA SMITH PRESENTS

Walk STRONG

 This 4-Week Master Calendar includes the following “Walk STRONG” programs along with a few of our complementary videos (available on DVD and digital download). Our “Walk STRONG” and related series feature workouts that offer a wide variety of ways to help you build muscle, burn fat, improve your flexibility and more. With low and high impact options, you can take the routines to your own personal challenge level every time you move with us.

Yoga Stretch for Beginners and Beyond

Develop a strong foundation of total body strength, stamina and flexibility with these two 30-minute practices designed to energize and strengthen and relax and rejuvenate (no chanting or sanskrit terminology used).

Walk STRONG: Burn Fat + Have Fun

Burn fat, build balance, coordination, agility, spatial awareness and more with these three creative, 30-minute calorie burning walks — no floor work at all.

Walk STRONG: Boost Metabolism + Muscle

Build muscular endurance, functional strength, boost metabolism and even prevent or reverse bone loss with these three 35-minute metabolic conditioning circuits.

Walk STRONG: Build Balance + Inner Strength

Improve your balance, agility, posture, coordination and core strength with these three 30-Minute fusion style barefoot sessions that combine elements of cardio, standing pilates and basic yoga — no floor work at all.

Walk STRONG: Total Transformation 6 Week System

Featuring ten 30-Minute sessions, this comprehensive plan includes everything from brain fitness, prehab and interval cardio to muscle building. Using a mix of high and low intensity workouts, this plan is designed to help you build your body up, not break it down.

Total Body Balance

This 80-minute fusion style DVD combines elements of ballet, barre, yoga, Pilates and sculpting into four 20-minute barefoot sessions that help balance your body and energy.

Cardio Abs

This intermediate to advanced level program combines HIIT cardio interval training, total body sculpting, targeted abs training plus a bonus Tabata session to maximize your flat abs results.

EXTRA STRONG

In addition to your daily sessions, we also recommend fitting in your daily dose of Vitamin W — walking! Working your way up to 10,000 steps a day can be a great way to add in more activity throughout your day without having to add in more exercise. Why is that important? Most of us are spending an average of 9-12 hours a day sitting! Even those of us who workout consistently. Studies show that even an hour-long workout isn't enough to combat the negative health effects of sitting all day. Rather than try to exercise more (which can sometimes increase your appetite and may overtax your system), stick with your scheduled workout and keep walking to stay more active throughout the day. Feel free to break up your walks into shorter segments. Need help stepping up your walking time? Check out our “Walk ON” series, designed to help you walk at home anytime, rain or shine!

Gentle Yoga for Balance, Mobility + Flexibility

Featuring easy, gentle and relaxing stretches, these sessions are perfect for beginners or regular exercisers needing to add in more flexibility work (no chanting or sanskrit terminology used, some chair modifications shown). Choose from four targeted, 20-minute flows (neck + shoulders, back + chest, hips + knees or total body).
